Comments

Please note this assessment has been carried out in accordance with the relevant planning and building controls at the time of the assessment as part of a pre-purchase due diligence assessment of the site. Any subsequent changes to these controls or any variation to the surrounding land use or vegetation prior to the construction of a building may alter the outcome of any future assessment.

The BAL rating is based on the existing characteristics of the site and surrounding area at the time of the assessment and of our understanding of the approved and ongoing urban development taking place surrounding the site.

Please note, at the time of writing Ministerial Amendment GC13 is currently under consideration to amend the Bushfire Management Overlay (BMO) mapping in this area. The amendment may affect this land in the future thereby making it necessary for additional assessment and approval in accordance with the BMO prior to the construction of a dwelling.

Site Plan

Refer to attached Plan of Subdivision, prepared by Hadden Farren, PS737185A Ver06.

Conclusion

The site assessment has been conducted on the above mentioned land, in accordance with AS3595-2009, to ascertain the Bushfire Attack Level (BAL) rating for the land.

The above assessment indicates the proposed building on the nominated allotment should be designed and constructed to the requirements of **BAL12.5** in accordance with the relevant standards of AS3595-2009.
